

CARE AND CLEANING

DUSTING

An oiled wooden floor repels dirt. Unlike many other types of flooring, it does not develop an electrostatic charge and does not offer breeding grounds for microbes and allergens. Dust, lint or animal hair can be removed with a vacuum cleaner or broom. Cleaning is even easier with the Osmo Cleaning Kit for Floors. The green Dust-Mop was especially developed for dry mopping.

- > Fast, quiet and energy-saving: cleaning with the Dust-Mop.
- > Osmo Cleaning Kit for Floors contains a basic mop head with connector for the Osmo System Telescopic Handle, a Dust-Mop, a Micro-Mop Plush and an Active Fibre Cloth.

REGULAR MOPPING

How often your wood flooring has to be mopped depends on the demands placed on it. For private households, once a week is normally enough, for restaurants and other high traffic areas, you should mop floors daily.

With one touch: Osmo Spray-Mop has a cartridge filled with the cleaner Spray-Fix.

- > Ideal for the fast, occasional spot cleaning of flooring.
- > For damp mopping with the Osmo Cleaning Kit for Floors, use the white Micro-Mop Plush.
- > A dash of Osmo Wash and Care in mop water removes everyday dirt and grime exceptionally. Thanks to its natural oils, it prevents the floor from drying out. Avoid the use of aggressive all-purpose cleaners.
- > NOTE: only use a damp mop – not wet! If required dry afterwards.

INTENSIVE CLEANING AND REFRESHING

From time to time, your wooden flooring needs refreshing. For private households, generally this is first necessary after some months. Osmo Liquid Wax Cleaner is ideal for such applications. The protective oil-wax layer is regenerated and your floor retains its special shine. For high traffic areas in restaurants and retail shops, Osmo Maintenance Oil should be used. It was especially developed for these areas. Regular refreshing could make sense here. Cleaning intervals depend on the amount of use.

- > Osmo Liquid Wax Cleaner cleans and regenerates in one step. Also available as a spray.
- > Osmo Maintenance Oil regenerates without forming a layer, special for commercial and public interiors.
- > For white oiled floors: Liquid Wax Cleaner or Maintenance Oil in White Transparent.
- > For larger areas, we recommend the floor cleaning machine FloorXcenter.

MAINTAINING AND RE-OILING

Sometimes life can leave marks, even on optimally maintained wooden flooring. No problem. That is why for an oiled wooden floor, the protective surface can be renewed at any time, without needing to sand the old finish. This is a huge advantage over lacquered wooden surfaces.

- > Clean floors thoroughly beforehand.
- > Manual application: apply an extremely thin layer of Osmo Polyx®-Oil with the Floor Brush or with the Osmo Microfibre Roller.
- > Machine application: Osmo FloorXcenter for intensive cleaning and for applying Polyx®-Oils.

MAINTENANCE KIT FOR FLOORS

The Maintenance Kit for Floors contains 1 litre Wash and Care, 0.4 litre Liquid Wax Cleaner Spray, 3 applicator cloths and comprehensive care instructions for your wooden flooring.

CLEANING KIT FOR FLOORS

For the maintenance and care of wood, synthetic, tiled and natural stone floors. Contains basic mop head plate with connector for Osmo System Telescopic Handle, Dust-Mop, Micro Mop Plush and Active Fibre Cloth.

SPRAY-MOP

With this innovative cleaning system, the cleaner Spray-Fix is sprayed from a refillable cartridge on the handle directly onto the wood floor. With machine-washable Active Fibre Mop.

TIPS AND TRICKS

CHANGING THE GLOSS LEVEL

With Liquid Wax Cleaner, you can change the gloss level of your flooring. If through the course of years flooring becomes duller, you can polish the top layer with Liquid Wax Cleaner. Alternatively, you can also give a high gloss flooring a less sensitive satin-gloss finish.

CONSTRUCTIONAL WOOD PROTECTION

It is absolutely necessary to set up large areas with floor mats and area rugs to trap moisture, dirt and salt carried in on shoes. To protect the floor surface against scratches and dents, place felt pads under the tables, chairs and furniture. Under office chairs with castor wheels, it is essential to use a plastic mat. Only this way can fine wood be efficiently protected against damages.
